

MARRARA BASKETBALL STADIUM

DARWIN. NT

Basketball stadium

This twin court international standard basketball and netball stadium incorporates best practice in sustainable design. Significant energy savings have been achieved through careful orientation, extensive roof overhangs, clerestory windows, and operable ground level perimeter walls. The building can be used for most of the time without the need for artificial lighting and air conditioning.

Client: NT Dept of Planning and Infrastructure
Location: Darwin, NT
Type: Sports
Project no:

2*
