

Commercial office building

This 'infill' commercial development site had a difficult set of parameters including the rail line on the rear boundary. The two storey offices above carparking have yielded a high profile presentation to the main street frontage and very high amenity offices.

The facade treatment assists with acoustic requirements and provides privacy and security, while retaining ventilation and sun control.

Client: King and Co. Property Consultants
Location: Woolloongabba, QLD
Type: Commercial
Project no: 06067
